2 Steps for GSE, 1 Giant Step for Performance Improvement

The acquisition of Hyperspring LLC and an investment into IntelliQlik LLC provides a critical piece of the long term strategy for GSE.

For years we have described ourselves as a Simulation, Training and Engineering company. With the acquisition of Hyperspring and IntelliQlik, we can truly say we have exploded onto the Performance Improvement scene. Together we improve human performance through turnkey training solutions, with our unique visualization and simulation environment, and through a staff of experienced instructors, engineers and specialists to support our clients’ internal projects.

- Plant Performance Improvement: Engineering Services, Virtual Commissioning, Engineering Simulation, and HFE Platforms

When we further combine our engineering and simulation capabilities, we not only address human performance, but performance of the entire plant from design through operations and optimization.

Hyperspring was established in 2004 and has provided professional services to companies such as TVA, PSE&G, Southern Nuclear, Entergy, PP&L and NRG. These employees provide direct operations support in the following areas:
- Training
- Procedure Development
- Work Management
- Tagging/Labeling
- Outage Execution
- Planning/Scheduling
- Corrective Action
- Self-Assessments
- Equipment Reliability

In addition to these services, Hyperspring also provides turnkey training programs for:
- GFES
- Accreditation Training Visit (ATV) preparation
- Maintenance
- SRO Certification

In addition to the Hyperspring transaction, GSE is investing in a new company, IntelliQlik. IntelliQlik is a next-generation learning delivery platform for online learning and learning management tailored to the new generation of operators/learners. Through a series of industry specific portals, IntelliQlik will train and certify qualified candidates for an industry with an ever-increasing need for skilled professionals.

This truly helps us achieve a goal of “Changing the Way the Energy Industry Learns.”

We are excited to bring these new and improved offerings to GSE’s breadth of services for the power and process industries. Contact us today to schedule a training consultation with our specialists.
About GSE Systems

GSE Systems, Inc. is a world leader in real-time high-fidelity simulation, providing a wide range of simulation, training and engineering solutions to the power and process industries. Its comprehensive and modular solutions help customers achieve performance excellence in design, training and operations. GSE’s products and services are tailored to meet specific client requirements such as scope, budget and timeline. The Company has over four decades of experience, more than 1,100 installations, and hundreds of customers in over 50 countries spanning the globe.

Information about GSE Systems is available at www.gses.com.
